

Business Analysis: Acme Systems Case Study

Case Study Scenario

Acme Systems: Acme Systems is a world leader in providing software for hotel industry. Our customer Byford Hotels has requested us to create system which allows following:

Cleaning-Staff: A person who has our app installed on our mobile phone. Cleaning staff visits locations/room assigned to him and clean the room.

Supervisor: A person who verifies the work of cleaning staff

Admin: A person who assigns location/room to cleaning staff and assign supervisor to rate same.

Our Requirement

The cleaning-staff on start of his shift login to the app. He then visits room/location which has been assigned to him by Admin. He starts the timer while selecting the location. He does the cleaning and fills the checklist with comments if any. Once done, he submits the report and marks the task complete. And so on.

The Supervisor visits the rooms/locations assigned to him. He pullout the details of his staff who cleaned to location. He verifies the work and assigns a rate to each item. Once done, he finally rates the work.

The admin allocates rooms/locations to cleaning-staff and supervisor.

Each cleaning staff and supervisor can service multiple locations/rooms

Your Task

You need to write SRS documents with Functional Point and Wireframe for a Web Application.

Goals & Objectives: Building mobile app to help manage and track progress of cleaning staff for a group of hotels

Deliverable: System Requirements System (User Stories), Wireframes

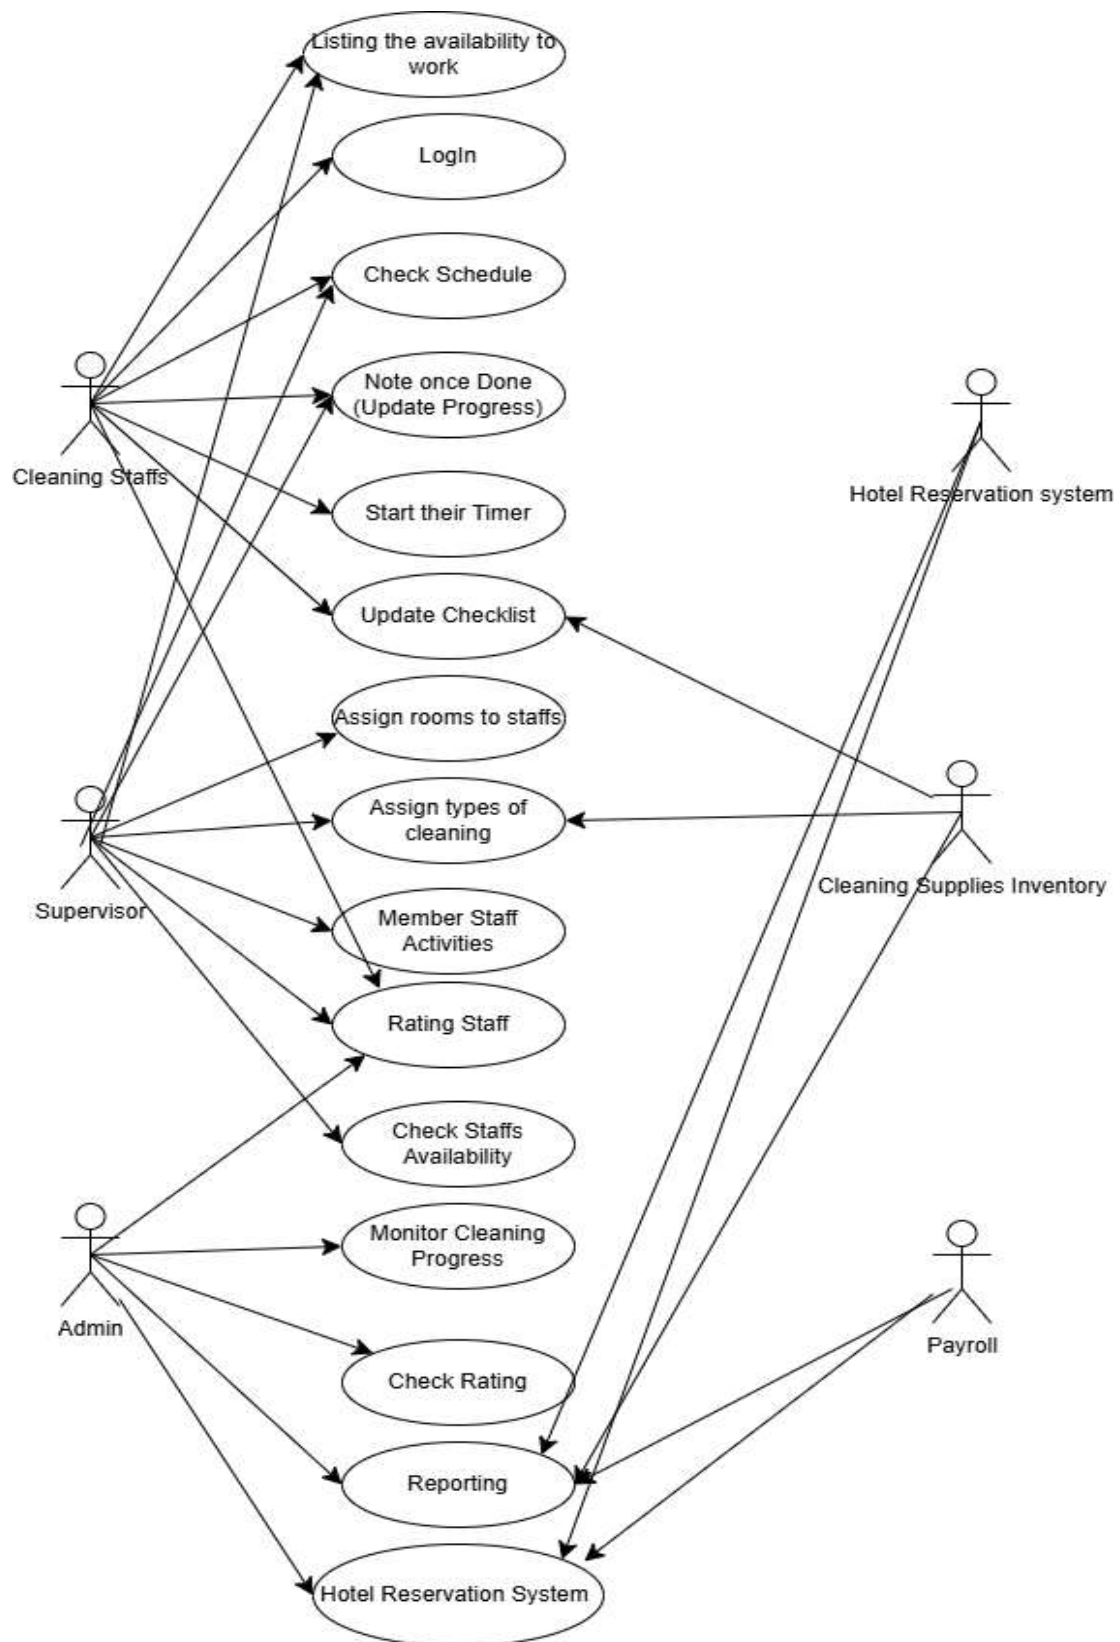

SDLC: Agile

Ask Questions?:

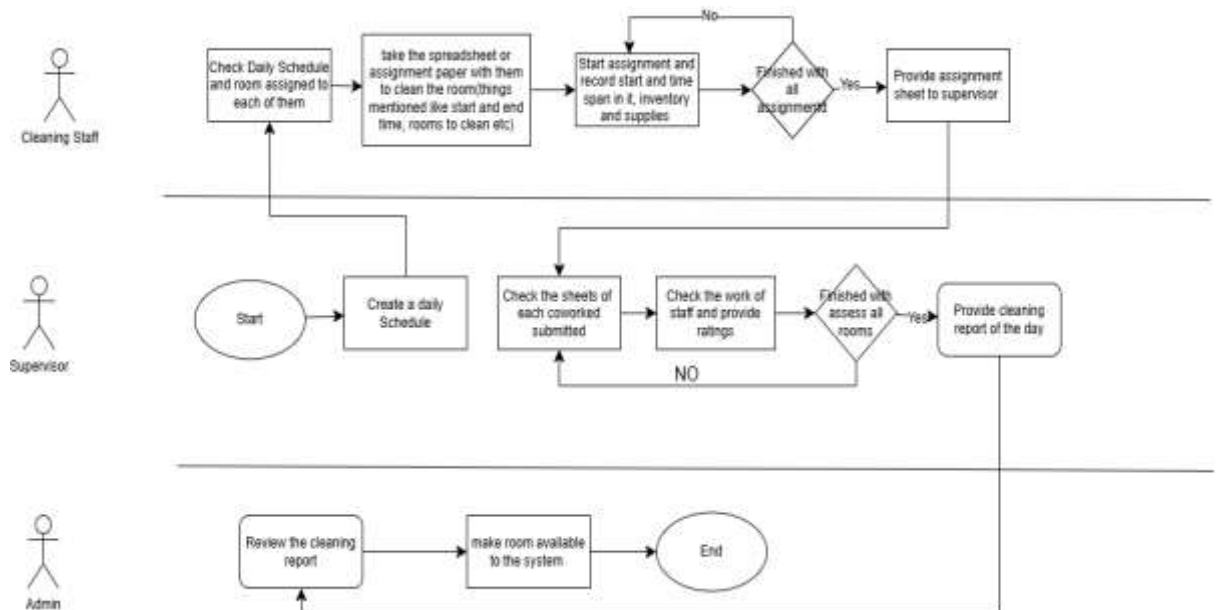

Acme Systems - Assumptions

1. Mobile app should work on Apple/android
2. Mobile Byford Group of Hotels
3. Byford Hotels has 10 hotels in the same state with the same timezone
4. 1 admin each hotel
5. 1 Supervisor per hotel
6. Each hotel has 200 rooms

7. Cleaning Staff shifts – 2 (Morning & Evening)
Use Case Diagrams

AS-IS Process Workflow Diagram (Swin Lane Diagram)

Create Product Backlog

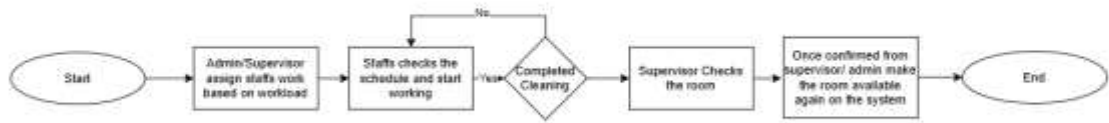

1. Mobile apps should work on Apple/Android
2. Input Available Hours (Staffs, Supervisor, Admin/Manager)
3. Login- Staff, Supervisor, Admin/Manager
4. Timer – When Start cleaning
5. Notes - Staff, Supervisor, Admin/Manager
6. Update Checklist – Supervisor
7. Assign Staff to rooms – Admin/Manager, Supervisor
8. Assign Type of Cleaning – Admin/Manager
9. Rating Staff– Admin/Manager, Supervisor
10. Create Schedule – Admin/Manager, Supervisor
11. Reporting – Admin/Manager
12. Reservation – Admin/Manager, Supervisor
13. Maintenance Request– Staff, Admin/Manager, Supervisor

Identifying Business Rules

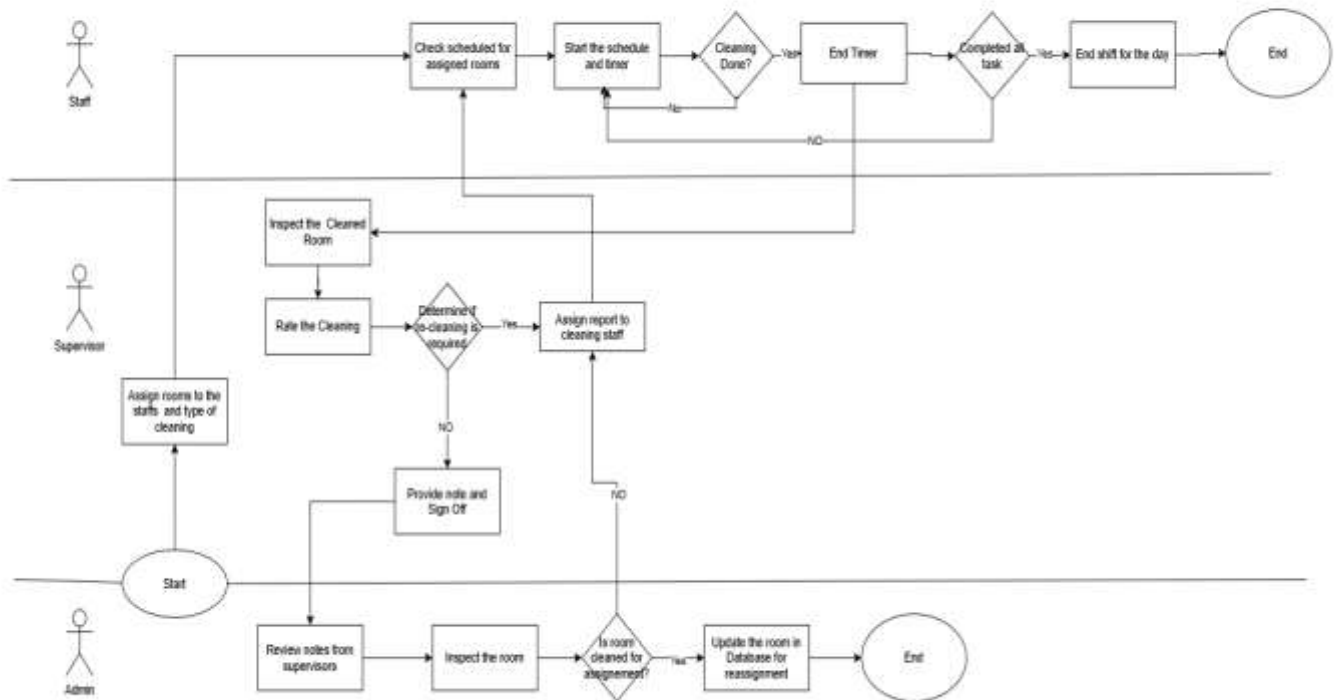

1. 5 or less rooms assigned to cleaning staff per day
2. Supervisor & Admin review required before assigning room to guest
3. Types of Cleaning
 - a. 1 Deep Cleaning
 - b. Daily cleaning
4. Deep Cleaning = Change sheets, Clean Bathroom and etc
5. Daily Cleaning = Make bed, add inventory items (Coffee, Water) and etc.

Prioritize Product Backlog (Highlighted are the functionality with higher priority)

1. Mobile apps should work on Apple/Android
2. Input Available Hours (Staffs, Supervisor, Admin/Manager)
3. Login- Staff, Supervisor, Admin/Manager
4. Timer – When Start cleaning
5. Notes - Staff, Supervisor, Admin/Manager
6. Update Checklist – Supervisor
7. Assign Staff to rooms – Admin/Manager, Supervisor
8. Assign Type of Cleaning – Admin/Manager
9. Rating Staff– Admin/Manager, Supervisor
10. Create Schedule – Admin/Manager, Supervisor
11. Reporting – Admin/Manager
12. Reservation – Admin/Manager, Supervisor
13. Maintenance Request– Staff, Admin/Manager, Supervisor

Breaking down the product backlog

1. Mobile apps should work on Apple/Android
 - a. Apple IOS Platform
 - b. Android Platform
2. Input Available Hours (Staffs, Supervisor, Admin/Manager)
 - a. Login Screen for Staff
 - b. Login Screen for Supervisor
 - c. Login Screen for Admin/Managers

- d. Register as Staff
- e. Register as Supervisor
- f. Register as Admin/Managers
- g. Landing Pages for Staff
- h. Landing Pages for Supervisor
- i. Landing Pages for Admin/Managers

3. Login- Staff, Supervisor, Admin/Manager

- a. Username field
- b. Password field
- c. Forgot Password
- d. Remember Me option
- e. Login Validation
- f. Error Messages
- g. Role-Based Access Control
- h. Logout Functionality
- i. Session Timeout

4. Assign Staff to rooms – Admin/Manager, Supervisor

- a. Display Available Rooms
- b. Display Available Staff
- c. Search Staff Member
- d. Filter Staff by Availability
- e. Assign Staff to Room
- f. Reassign Staff to Room
- g. Remove Staff Assignment
- h. View Room Occupancy Status
- i. View Staff Assignment History
- j. Send Assignment Notification

5. Assign Type of Cleaning – Admin/Manager

- a. Standard Cleaning
- b. Deep Cleaning
- c. Check-Out Cleaning
- d. Maintenance Cleaning
- e. Emergency Cleaning
- f. Assign Cleaning Type to Room
- g. Edit Cleaning Type
- h. Remove Cleaning Type
- i. Display Cleaning Instructions
- j. Track Cleaning Status
- k. Mark Cleaning Complete

6. Create Schedule – Admin/Manager, Supervisor

- a. Create Daily Schedule
- b. Create Weekly Schedule
- c. Create Monthly Schedule
- d. View Staff Availability
- e. View Room Availability
- f. Assign Staff to Schedule
- g. Assign Room to Schedule
- h. Assign Cleaning Type to Schedule
- i. Edit Schedule
- j. Delete Schedule
- k. Publish Schedule
- l. Notify Staff of Schedule
- m. View Schedule Calendar
- n. Handle Staff Absences
- o. Handle Shift Changes
- p. View Schedule History

User Story with Acceptance Criteria

1. Mobile Apps should work on Apple/Android

1.1 Apple IOS Platform

As a staff member, I want to access the application on my Iphone, so that I can view my schedule and assignments from anywhere.

Given, the user has an Apple IOS device

When, the user install and opens the application

Then, the application should function correctly on IOS devices

1.2 Android Platform

As a staff member, I want to access the application on my Android Device, so that I can view my schedule and assignments from anywhere.

Given, the user has an Android device

When, the user installs and opens the application

Then, the application should function correctly on Android devices

2. Input Available Hours

2.1 Login Screens for Staff

As a staff member, I want the ability to log into the app so that I can provide my availability.

Given that I have successfully logged into the app,

When I click on “Add Availability” button

Then the app allows me to add my availability for the upcoming week

2.2 Login Screen for Supervisor

As a Supervisor, I want the ability to log into the app so that I can view staff availability and can create schedules effectively.

Given that I have successfully logged into the app,
When I click on "View Availability of Staff Schedule" button
Then the app allows me to view the listed hours given by staff and allows me to create schedule for upcoming week

2.3 Login Screen for Admin/Managers

As an admin/manager, I want to view staff availability, so that I can allocate resources efficiently.

Given staff availability exists in the system
When the admin accesses availability information
Then the staff availability should be displayed.

3. Login – Staff, Supervisor, Admin/Manager

3.1 Login

As a user, I want to log into the application using my username and password, so that I can access features based on my role.

Given the user has valid credentials
When the user enters username and password and clicks Login
Then the user should be redirected to the appropriate dashboard.

3.2 Forgot Password

As a user, I want to reset my password if I forget it, so that I can regain access to my account.

Given the user is on the login page
When the user clicks "Forgot Password"
Then a password reset process should be initiated.

4. Assign Staff to Rooms

4.1 Assign Staff

As a supervisor, I want to assign staff members to rooms, so that cleaning tasks can be completed efficiently.

Given rooms and staff are available
When the supervisor assigns a staff member to a room
Then the assignment should be saved successfully.

4.2 Reassign Staff

As a supervisor, I want to reassign staff to different rooms, so that operational changes can be accommodated.

Given a room assignment already exists
When the supervisor updates the assignment
Then the new assignment should be saved.

4.3 View Assignment History

As an admin, I want to view staff assignment history, so that I can monitor resource allocation.

Given assignments have been made previously
When the admin views assignment history
Then historical assignment records should be displayed.

5. Assign Type of Cleaning

5.1 Assign Cleaning Type

As an admin/manager, I want to assign a cleaning type to a room, so that staff know what cleaning activities are required.

Given the room exists in the system
When the admin selects a cleaning type
Then the cleaning type should be assigned successfully.

5.2 View Cleaning Instructions

As a staff member, I want to view cleaning instructions, so that I can perform the required cleaning correctly.

Given a cleaning type has been assigned
When the staff member opens the room details
Then the cleaning instructions should be displayed.

5.3 Mark Cleaning Complete

As a staff member, I want to mark a cleaning task as complete, so that supervisors can track task progress.

Given a cleaning task is assigned
When the staff member completes the task and clicks "Complete"
Then the task status should be updated.

6. Create Schedule

6.1 Create Schedule

As a supervisor, I want to create schedules for staff members, so that cleaning activities are planned efficiently.

Given staff availability is available
When the supervisor creates a schedule
Then the schedule should be saved successfully.

6.2 Edit Schedule

As a supervisor, I want to edit schedules, so that changes in operations can be accommodated.

Given a schedule exists
When the supervisor modifies the schedule
Then the updated schedule should be saved.

6.3 Publish Schedule

As a supervisor, I want to publish schedules, so that staff can view their assigned shifts.

Given a schedule has been created
When the supervisor publishes the schedule
Then staff members should be notified.

6.4 View Schedule

As a staff member, I want to view my assigned schedule, so that I know when and where I am required to work.

Given a schedule has been published
When the staff member logs into the application
Then the assigned schedule should be displayed.

Sprint Planning
